Prices for seed service

Cone and seed analyses	SEK/analysis
1. Cones' ability to shed, seed yield and weight per 1000 seeds.	355
2. Moisture content in cones or seed.	85
3. Insect damage in spruce cones examined by cutting.	270
4. Anatomical potential, insect damage, empty and filled seeds, by X-ray examination.	260
5. Germination capacity, germination energy, abnormal seeds, fresh not germinable and dead seeds. Examined at germination table with 4 x 100 seeds. Weight of 1000 seeds.	330
6. Germination capacity, germination energy, abnormal seeds, fresh not germinable and dead seeds examined in the temperature range of ~15–30°C with 12 x 40 seeds.	480

We recommend that cone samples should include at least one litre of cones and 15 cones for cutting. Seed samples should include approximately 15 g, sealed in waterproof and shock-absorbing material to avoid damage and loss/uptake of water during transport.

Prices for seed service

Seed cleaning and seed treatments

SEK/kg treated seed

7. Dewinging and rough cleaning ¹⁺²⁾	
income/outcome - ratio > 0,6	160
0,4 - 0,6	210
< 0,4	265
8. Fine-cleaning (dewinging, sorting out empty seeds), PREVAC (separates damaged seeds of pine) and water flotation (spruce). ¹⁺²⁾	195
9. Water flotation separation (spruce). ¹⁾	90
10. Fractioning to size or density according to the customers requirements. ¹⁾	95
11. Invigoration to increase germination energy. ¹⁾	480
12. IDS (separation of dead seeds including invigoration). Normally sorting of 3-5 fractions or according to customer's requirements. ¹⁾	850
13. IDS-simplified (separation of dead seeds including invigoration). Sorting into two fractions. ¹⁾	650
14. Seed extraction (kiln), price per litre (min. 50 litre).	10

Discount: Seed lots are dried to a moisture content of 4-7 % (=storable). Recorded moisture content is noted. Cost of drying is 80 SEK/fraction.

Drying: Seed lots are dried to a moisture content of 4-7 % (=storable). Recorded moisture content is noted. Cost of drying is 80 SEK/fraction.

Insurance: The seed is insured against fire and water damage, technical equipment failure and theft during the time it is with Skogforsk at Sävar. Skogforsk is not responsible for seed during transport to and from Sävar.

Treated seed is packaged either in plastic containers (10 liters and 20 liters) or in plastic bags (5 kg). Packaging into smaller units is charged at hourly rate.

¹⁾ För finrensning av lövträd debiteras timtid.

²⁾ Partier <2 kg debiteras för 2 kg. Partier 2–16 kg multipliceras med en faktor, se figur 1.

³⁾ Fröservice avtalskunder har 10 % rabatt på vitalisering och IDS.
